SUMMARY

DevOps & Cloud Engineer with **4+ years of experience** architecting cloud native and containerized platform across GCP and Azure. Expert in managing 350+ GKE and AKS clusters at Accenture, automating provisioning and deployments with **Terraform, and CI/CD pipelines**, cutting manual effort by 50% and deployment time by 40%. Proven experience optimizing Kubernetes infrastructure across multi cloud environment raising resource utilization by 30% and ensuring robust operational health, reliability, security compliance and integrated AI assisted workflows for operational stability.

TECHNICAL SKILLS

Cloud Platforms & Infrastructure as Code: GCP, Azure, AWS, Oracle Cloud, HashiCorp Terraform, Ansible.

Containerization & Orchestration: Kubernetes, Docker, Azure Kubernetes Service, GKE, EKS, Helm, Argo CD

CI/CD & DevOps Tools: Jenkins, GitHub Actions, GitLab, Git, GitHub, Azure DevOps (Repo, pipeline, Board, Artifacts).

Monitoring & Logging: Prometheus, Grafana, ELK Stack [Elasticsearch, Logstash, Kibana].

AI & Automation: LLM Integration, Agentic AI, GenAI Automation, AI Assisted Troubleshooting, Prompt Engineering.

Scripting & Databases: Python, Bash, PowerShell, MySQL, MongoDB.

DevOps Ecosystem: Elastic Container Registry, Azure Container Registry, Docker Hub, ServiceNow, JIRA, Linux, Windows.

SOFT SKILLS

Problem Solving | Cross-Functional Collaboration | Troubleshooting & Root Cause Analysis | Ownership & Accountability | Adaptable Communication | Continuous Learning | Conflict Resolution | Stakeholder Coordination

EXPERIENCE

DEVOPS & AUTOMATION ENGINEER

[Nov 2024 – Present]

Accenture

Gurugram

- Oversaw **350+ production and non-production** GKE and AKS clusters, maintaining high availability, performance, and security across environments.
- Architected and maintained enterprise landing zones and shared service models on **Google Cloud Platform (GCP)**, implementing governance guardrails, IAM, and secure cross cloud connectivity.
- **Executed GKE and AKS cluster and node pool upgrades with HashiCorp Terraform**, applying controlled rollout strategies to minimize downtime and preserve application stability.
- Architected and provisioned **GCP and Azure** infrastructure using **HashiCorp Terraform and Vault**, ensuring consistency, repeatability, and compliance across multi-environment deployments.
- Diagnosed complex Kubernetes pod, networking, storage, ingress, and node level issues, boosting cluster reliability and shortening incident resolution time.
- Standardized **upgrade, rollback, monitoring, and recovery procedures** and collaborated with cross functional teams to improve governance, capacity planning, and secure application onboarding.
- Architected and deployed Python-driven automation and GenAI infrastructure provisioning workflows with LLM integration, Agentic AI, Ansible, Jenkins, and Docker, **cutting manual effort by 50% and deployment time by 40%**.
- Designed, optimized, and maintained CI/CD pipelines, enabling faster and more reliable release cycles across multiple environments.
- Established standardized deployment and rollback strategies, reducing release risk and improving recovery time during failures.
- Embedded validation checks, error handling, and logging into Python automation scripts and **cutting troubleshooting time by 30%** and enhancing operational stability.
- Facilitated environment setup, upgrades, patching, and routine operational tasks, enabling smoother transitions among development, testing, and production stages.
- Created reusable Ansible playbooks and Python automation templates, **improving configuration consistency by 60%** and minimizing environment drift while accelerating infrastructure management.

DEVOPS ENGINEER

[June 2022 – Nov 2024]

Infosys

Chandigarh

- Orchestrated scalable containerized applications on **Rancher managed Kubernetes** clusters, ensuring high availability and **raising resource utilization 30%**.
 - Built, maintained, and optimized **CI/CD pipelines with GitHub Actions**, cutting deployment time 40% and enabling faster automated releases.
 - Secured container images and managed repositories via **Azure Container Registry**, enforcing version control, access policies, and image lifecycle management.
 - Deployed monitoring and alerting with **Prometheus and Grafana**, reducing mean time to detect issues 35% through proactive visibility.
 - Configured and managed the ELK Stack (Elasticsearch, Logstash, Kibana) to collect, aggregate, and analyze application and infrastructure logs, enhancing monitoring and troubleshooting.
 - Streamlined operational workflows with **ServiceNow**, reducing incident, change, and problem management effort and improving response coordination.
 - Supported production environments by troubleshooting deployment, performance, and infrastructure issues, **minimizing downtime and enhancing service stability**.
 - Implemented standardized deployment, rollback, and scaling strategies to reduce release risk and improve recovery during failures.
 - Collaborated with development, QA, and operations teams to align deployment strategies, boost delivery efficiency, and support continuous improvement initiatives.
-

CERTIFICATIONS

- **Microsoft** Certified: DevOps Engineer Expert
 - **Claude** Certified Architect – Professional
 - **ORACLE** Cloud Infrastructure DevOps Professional
 - **Microsoft** Certified: Azure Administrator Associate
 - **Microsoft** Certified: Azure Fundamentals
 - **Claude** Certified Associate/Architect – Foundation
 - **AWS** Certified Cloud Practitioner
-

EDUCATION

BACHELOR OF TECHNOLOGY

Raj Kumar Goel Engineering College, Ghaziabad

[2017 – 2021]

CGPA: 8.0

ACHIEVEMENTS

ACCENTURE ACE Award

INFOSYS INSTA Award

July 2026

June 2024
